Introduction

This is the most comprehensive course available for the field today. It should be required reading for every health care administrator, as it has been thoroughly revised and updated to reflect changes in the health care industry and the renewed focus on health care information technology initiatives, this course is a valuable training for health administration and health informatics students and professionals.

Course Objectives

On completion of this course you should be able to:

- List and illustrate the various types of healthcare information
- Gain an excellent overview of foundational principles and practical strategies
- Apply the tools necessary to facilitate movement from a paper-based to an electronic health record environment while championing the importance of managing in such an environment.
- Deploy health care information technology and leverage investments while introducing significant change.
- Develop the skills required to enhance quality of patient care through the use of health care information technology and strategy considerations.
- Stimulate discussions on how to apply concepts included in the course to real-life scenarios through case studies of organizations experiencing management-related information system challenges.

Course Outline

Health Care Information

Introduction to Health Care Information

- Types of Health Care Information
- Internal Data and Information: Patient Specific—Clinical
- Internal Data and Information: Patient Specific—Administrative
- Internal Data and Information: Patient Specific—Combining Clinical and Administrative
- Internal Data and Information: Aggregate—Clinical
- Internal Data and Information: Aggregate—Administrative
- Internal Data and Information: Aggregate—Combining Clinical and Administrative
- External Data and Information: Comparative
- External Data and Information: Expert or Knowledge Based

Health Care Data Quality

- Data versus Information
- Problems with Poor-Quality Data
- Ensuring Data and Information Quality

Health Care Information Regulations, Laws, and Standards

- Licensure, Certification, and Accreditation
- Patient Safety Organizations
- Legal Aspects of Managing Health Information

Health Care Information Systems

History and Evolution of Health Care Information Systems

- Definition of Terms
- History and Evolution

Clinical Information Systems

- The Electronic Health Record
- Other Major HCIS Types
- Fitting Applications Together
- Overcoming Barriers to Adoption

Federal Efforts to Enhance Quality of Patient Care through the Use of Health Information Technology

- HITECH Act
- Health Care Reform: New Modes of Care and Payment Reform
- Health Information Exchange
- Information Technology Ramifications of New Models of Care and Payment Reform

System Acquisition

- System Acquisition: A Definition
- Systems Development Life Cycle
- System Acquisition Process
- Project Management Tools
- Things That Can Go Wrong

System Implementation and Support

- System Implementation Process
- Managing the Organizational Aspects

- System Support and Evaluation

Information Technology

Technologies That Support Health Care Information Systems

- Information Technology Adoption Challenges
- Data Management and Access
- Networks and Data Communications
- Information Distribution Schemes
- Remote Access Technologies
- Internet and Web Concepts and Applications
- E-Commerce in Health Care
- Clinical and Managerial Decision Support
- Information Systems Architecture

Health Care Information System Standards

- Standards Development Process
- Classification Standards
- Vocabulary and Terminology Standards
- Health Record Content and Functional Standards

Security of Health Care Information Systems

- The Health Care Organization's Security Program
- Threats to Health Care Information
- Overview of the HIPAA Security Rule
- Outline of the HIPAA Security Rule
- HITECH Expansion of the HIPAA Security Rule
- Administrative Safeguards
- Physical Safeguards
- Technical Safeguards

- Security in a Wireless Environment
- Remote Access Security

Senior Management IT Challenges

Organizing Information Technology Services

- Information Technology Functions
- Organizing IT Staff and Services
- In-House versus Outsourced IT
- Evaluating IT Effectiveness

IT Alignment and Strategic Planning

- IT Planning Objectives
- Overview of Strategy
- Vectors for Arriving at IT Strategy
- The IT Asset
- A Normative Approach to Developing Alignment and IT Strategy
- IT Strategy and Alignment Challenges
- Characteristics of Strategic Thinking

Strategy Considerations

- Complementary Strategies
- Strategy Evolution
- Governing Concepts
- The Competitive Value of IT

IT Governance and Management

- IT Governance

- IT Effectiveness
- IT Budget

Management's Role in Major IT Initiatives

- Managing Change Due to IT
- Managing IT Projects
- Understanding IT Initiative Failures

The Scandinavian Academy for Training Center adopts the latest scientific and professional methodologies in training and human resource development, aiming to enhance the efficiency of individuals and organizations. Training programs are delivered through a comprehensive approach that includes:

- Theoretical lectures supported by PowerPoint presentations and visual materials (videos and short films).
- Scientific evaluation of participants before and after the program to measure progress and knowledge acquisition.
- Brainstorming sessions and practical role-playing to simulate real-life scenarios.
- Case studies tailored to align with the training content and participants work nature.
- Assessment tests conducted at the end of the program to evaluate the achievement of training objectives.

Each participant receives the training material (both theoretical and practical) in printed form and saved on a CD or flash drive. Detailed reports, including attendance records, final results, and overall program evaluations, are also provided.

Training materials are prepared professionally by a team of experts and specialists in various fields. At the end of the program, participants are awarded a professional attendance certificate, signed and accredited by the Scandinavian Academy for Training Center.

Program Timings:

- 9:00 AM to 2:00 PM

The program includes:

- A daily buffet provided during the sessions to ensure participants comfort.
- A closing ceremony on the final day to distribute certificates and celebrate participants achievements.
