Introduction

Learn to take control and not let equipment problems risk your production schedule. Don’t be afraid to schedule shutdowns — it’s a good preventive measure. There are many benefits of well planned and executed shutdowns; more proactive maintenance = less reactive or emergency maintenance. Expertly plan your shutdowns, managing and controlling the risks of serious budget overturns and costly schedule delays while maintaining the quality of the work being performed.

WHO SHOULD ATTEND?

This course is intended for plant short term and long term (shutdown) planners and contractor staff, who are involved in the planning, co-ordination and execution of plant shutdowns and turnarounds. The Conference is especially valuable for turnaround managers and co-coordinators, planning/scheduling and cost control staff, construction supervisors, project engineers and contract administrators. Participation from inspection, materials, safety and maintenance engineering and maintenance Supervisor is also encouraged.
