Introduction

This training course will provide participants with an insight into the fundamentals of managing Modern and Effective Security Operations. it will address a wide variety of topics such as security policies and procedures, risk management, access management, and investigation, to enable all participants to understand the principles of security and risk management.

Management of security risks applies the principles of risk management to the management of security threats. It consists of identifying threats (or risk causes), assessing the effectiveness of existing controls to face those threats, determining the risks` consequence(s), prioritizing the risks by rating the likelihood and impact, classifying the type of risk and selecting an appropriate risk option or risk response. This training course will provide practical and up-to-date security management skills and techniques that can be implemented within each participant’s organization and security team.

A Security Operations Manager must have oversight of the multiple activities performed in day-to-day operations, while keeping on top of continuous regulatory development. This training course validates your ability to manage your team, suppliers, resources, and business processes in line with current industry standards. You will learn all the necessary security measures in response to dynamic security demands
